As far as it was possible the seeds in the list have been ripened well. From many seeds the germination has been controlled. But Often the rarest and most difficult to obtain seeds are the ones that cause the most problems. It is precisely for that reason that they are highly sought after, because they are difficult to obtain and germinate, sometimes because of their dormancy, other times because they have to be scarified and other times because they are hybrid seeds that are hardly viable.

I've taken extra steps in the seed processing to ensure the highest germination rates possible by culling all floaters and underdeveloped embryo's, the seeds are fresh, but we can't control our entire stock. Every step is taken to produce the highest quality seeds possible, however there is NO GUARANTEE of germination - these seeds are offered AS-IS at the BUYERS RISK!

Mostly the seeds have been harvested in my own collection; to make the list more complete some seeds came from by good reliable friends.

To place an order, please contact <https://www.facebook.com/plopezartes>

The minimum order value goods is 25,00 EURO or 28,00 USD without mail and other charges fees. Payments will be made through Paypal (mainly "Friends and Family" option, if not, then 7.5% Paypal taxes must be added), Wise, Western Union or Bank transfer sometimes in local currency (ask about the latter). For postage and packaging you will be charged for 8.5€ min. The order will be handled as soon as possible. When it is ready you will receive an PM including also the final costs. Please DO NOT send payment until we request payment. We will request money from you when we are ready. After payment, we will send the package and write you the tracking number of the package. Please ordering seeds fast in time, because seeds stock will be decline, thank you very much.

We will only send seeds to non-EU addresses at BUYERS RISK! If unwilling to accept the risk of loss, please inquire as to options before ordering.

Some countries prohibit seed import and get flagged in customs. Many countries offer a "Small Lots" seed import license, check with your Dept of Agriculture, in the USA is USDA.

If inspected, buyer agrees to pay all customs duties, VAT, and/or other taxes and fees that may be levied by your government. You are responsible for knowing and heeding any import regulations, prohibitions and restrictions which may apply. Phytosanitary certificates cannot be provided due to personal circumstances.

SEED ORDERS FROM AUSTRALIA ARE POSSIBLE, BUT ONLY IF THE CUSTOMER ACKNOWLEDGES THE STRICT IMPORT RESTRICTIONS IN ADVANCE AND CONFIRMS TO IMPORT THE SEEDS AT THEIR OWN RISK.

I wish you a lot of fun while looking through the list and later on good luck with the germination. I'd like to hear of your results.

This catalog has two blocks, the first is referred to columnar and others that allow hybridizations, such as Echinopsis, Lobivia, Soherensia with Trichocereus. And the second block is for globular, they start with Acanthocalycium.

Thank you very much for ordering. We hope that our seeds will make you happy and thus we wish you good luck in sowing. We are very sorry if you did not find all of the items you ordered. Every season we obtain a huge pile of orders and even if we are doing our best to handle each order fully and properly and send as much as possible, sometimes the seeds you order are sold out. **We apologize ourselves for this inconvenience and thank you a lot for understanding!**
